

TELECOM APPROVAL

COMPANY PROFILE

Decorative white lines in the bottom left corner of the dark blue background.

WHO WE ARE

Telecom Approval is a specialized company dedicated to providing professional telecommunications equipment homologation services in Bolivia. We are committed to ensuring that telecommunications equipment meets all regulatory requirements and technical standards established by Bolivian authorities.

Our mission is to facilitate the certification process for companies and individuals seeking to import, distribute, or operate telecommunications equipment in Bolivia, guaranteeing transparency, responsibility, and honesty in every step of the process.

OUR SERVICE

We provide comprehensive homologation and certification services for all types of telecommunications equipment, including:

- Mobile devices and smartphones
- Radio communication equipment
- Wireless network devices (routers, access points)
- Satellite communication equipment
- IoT devices and sensors
- Base stations and telecommunications infrastructure
- Any equipment operating in regulated frequency bands

Our homologation process ensures full compliance with:

- Bolivian telecommunications regulations
- Technical specifications and standards
- Frequency allocation requirements
- Safety and electromagnetic compatibility standards

WHY CHOOSE TELECOM APPROVAL?

◆ **Exclusive Online Tracking Platform (Launching January 2026)**

We will be the first homologation service provider in Bolivia offering a dedicated online platform where clients will be able to:

- Monitor their application progress in real-time
- Access complete certificate history
- Review current applications in process
- Download approved certificates
- Receive instant notifications on status changes

◆ **Transparency & Honesty** We maintain clear communication throughout the entire process, providing accurate timelines and realistic expectations. No hidden fees or unexpected charges.

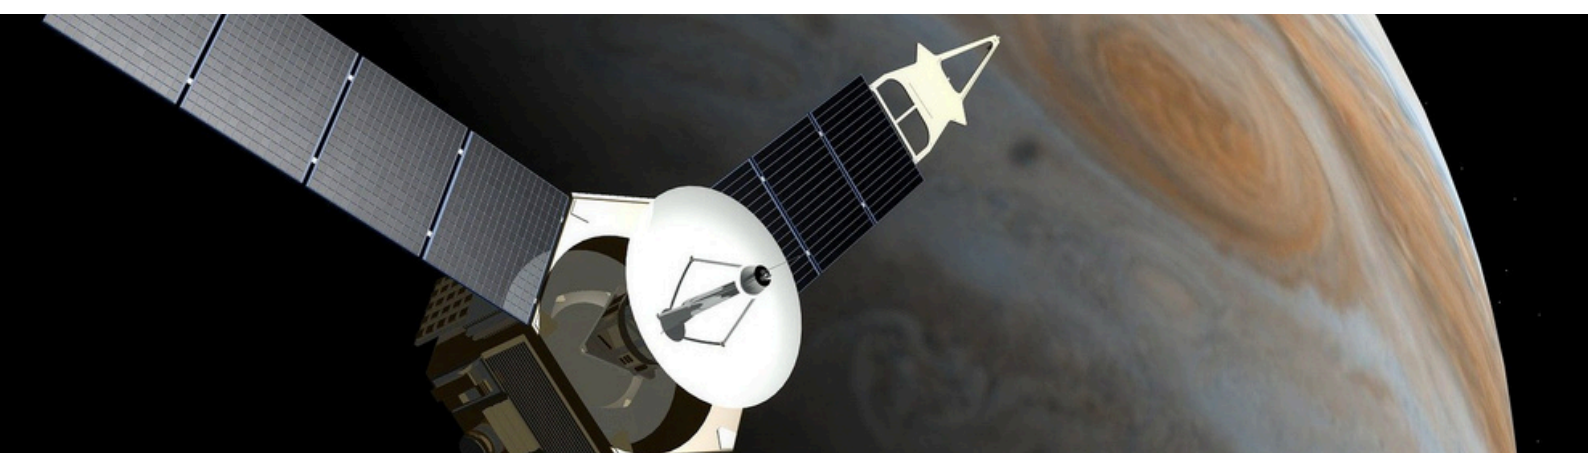

◆ **Specialized Expertise** Our team focuses exclusively on telecommunications equipment homologation, ensuring deep knowledge of regulations, technical requirements, and best practices.

◆ **Guaranteed Regulatory Compliance** We stay updated with the latest regulatory changes and ensure your equipment meets all current requirements for successful certification.

◆ **Efficient Processing Times** Our streamlined processes and proactive timeline management enable us to minimize processing times without compromising quality. We actively monitor regulatory timelines established by ATT and utilize official channels to ensure applications progress according to normative deadlines, preventing unnecessary delays.

◆ **Personalized Attention** Each client receives dedicated support from our expert team, with direct communication channels and responsive customer service.

◆ **International Quality & Security Standards** Our processes follow ISO 9001 and ISO 27001 frameworks, with defined SLAs and strict confidentiality agreements to protect your information.

OUR PROCESS

Step 1: Initial Consultation Contact us with your equipment specifications. We provide preliminary assessment and guidance.

Step 2: Documentation Review We review all technical documentation and identify any missing requirements.

Step 3: Application Submission We prepare and submit the complete homologation application to regulatory authorities.

Step 4: Progress Updates: Receive regular updates on your application status. Starting January 2026: Track everything through our online platform 24/7.

Step 5: Certificate Issuance Upon approval, receive your official homologation certificate through our platform.

OUR VALUES

Transparency Open and honest communication at every stage of the homologation process.

Responsibility Committed to ensuring full regulatory compliance and accurate documentation.

Honesty Realistic timelines, fair pricing, and truthful assessments of requirements.

Professionalism Specialized expertise and dedicated focus on telecommunications homologation.

Innovation Leveraging technology through our online platform to enhance client experience.

Security & Confidentiality Protecting your sensitive technical and business information through strict confidentiality agreements and ISO 27001-based security practices.

QUALITY & SECURITY STANDARDS

At Telecom Approval, we are committed to the highest standards of quality, security, and professionalism:

 **ISO 27001-Based Information Security** Our information security management processes are based on ISO 27001 standards, ensuring the confidentiality, integrity, and security of all your technical documentation and sensitive information.

✓ **ISO 9001-Based Quality Management** We have adopted ISO 9001 principles in our quality management system to guarantee consistent, reliable, and high-quality service delivery in every homologation process.

 **Service Level Agreements (SLA)** We provide clear SLAs with defined timelines and commitments for each stage of the homologation process, giving you predictability and peace of mind.

 **Confidentiality Agreements (NDA)** All client information is protected under strict confidentiality agreements. Your technical specifications, business information, and documentation remain completely secure.

Our commitment to international standards ensures:

- Consistent and predictable service delivery
- Protection of your confidential information
- Alignment with international best practices
- Reliable processes you can trust
- Professional accountability at every step

COMING SOON - JANUARY 2026

Revolutionary Online Platform

We are proud to announce the launch of our exclusive online tracking platform in January 2026. This innovative tool will transform the homologation experience by providing:

- ✓ Real-time application tracking
- ✓ Complete digital certificate archive
- ✓ Instant status notifications
- ✓ Document management system
- ✓ 24/7 access from any device

Be among the first to experience this groundbreaking service in Bolivia's telecommunications homologation industry.
